

AllerPops®

Prebiotic Lollipops

📍: 1650 Trinity Dr. #103, Los Alamos, NM 87544.
☎: 505 695 4236. ✉: info@allerpops.com
🌐: www.allerpops.com

Directions

1 pop every other day,
after night oral hygiene routine

Enjoy!

Let it slowly melt in your mouth. Do not
chew the lollipop or swallow it whole.

Discard remaining pop after an hour.

Who should not use AllerPops: Pregnant women, people with
an infection in the airway or head/neck area, or if you're allergic
to any of the ingredients.

Warning: Though it rarely happens, discontinue using AllerPops
if you feel ill, tired, have a low fever or head-ache. These
feelings should go away within a week, likely with your allergy
symptoms.

What to expect: You may not feel a significant change after the
first several pops. Some people use AllerPops as a preventative
1-3 times before the allergy season begins and experience even
better lasting results. No additional oral hygiene is needed
during the time you're using AllerPops.

Excessive oral hygiene may prevent AllerPops from working
completely. AllerPops Prebiotic Toothpaste is a companion
product for AllerPops and can enhance and sustain the results
from AllerPops with daily dose nutrition to the good bacteria in
the mouth.

The best way to use these two products is to start with both and
maintain the results with the toothpaste.

Choking hazard! Adults should supervise any use by children
under three years old.

Oral hygiene: After you have satisfied results, brush and floss
with a frequency of once or twice a day for teeth and gum
health. Do not use mouthwash, a Neti-pot, tongue cleaning or
oil-pulling.
